

8th 1-5

Solving equations

ex.) $8 + x = 15$

Ask yourself - what number can I plug in for x that can be added to 8 and equal 15?

(7) $7 + 8 = 15$ ☺

*If you get stuck - try guess and check

Writing equations

ex.) The difference of a number and ten is seventeen.

think... difference means subtract
you will have to pick a variable/letter
is means equal (=)

$$n - 10 = 17$$

solve.... $27 - 10 = 17$

(27)
